

PharmaQMtraining.eu

A Short Course on Regulatory Affairs with emphasis on the Biological/Biotechnological Drug Substances and Products

22 - 23 June 2010

Legacy Falcon Hotel, Stratford-upon-Avon, United Kingdom

COURSE OBJECTIVES, STRATEGY & TARGET AUDIENCE:

Bookings are open for our new 'Biologicals' meeting spanning two days in June 2010.

The programme offers **scientific information with a regulatory focus on the many different classes of 'biologicals'** including some hormones, blood products and factors, 'immunologicals' (e.g. vaccines, antibodies) made using sophisticated (recombinant) biological culture or cloning systems.

The subjects of comparability and biogenerics will be addressed as will special and varied issues concerning possible contamination and necessary purification activities.

Regulatory insight will be provided about documentation supporting EU applications at IMP (investigational medicinal product) and MA (Marketing Authorisation) stages in the life of biopharmaceuticals.

Common deficiencies in companies' applications will be identified. More details

Delegates are likely to be from the pharmaceutical and biotechnology industries working mainly in analytical, regulatory, Quality Assurance or management roles. The course is suitable for people new or relatively new to regulatory affairs as well as for more experienced staff looking to broaden or update their knowledge about regulatory affairs and biologicals.
